PLR Use and Customization Info PLEASE READ

Customization requirements depend on where you're selling. If selling on Etsy or similar marketplaces: Substantial customization is required. Etsy compares visual design—layout, artwork, colors, graphics—to other listings. Minimal changes can result in flagged listings, warnings, or removals. Make your version visually different: swap graphics, update colors throughout, change fonts, adjust backgrounds, and move elements around.

If selling on your own website: Light customization is enough. Change a few graphics, swap colors and fonts, create a unique cover image, or add your branding. A full redesign isn't required unless you want to. Just make sure your version isn't identical to the original to keep things fair for all sellers and the marketplace healthy.

My goal is to help you create unique, high-quality products and get them listed quickly, so you can offer fun Easter designs and start making seasonal sales with confidence. 🐰
