

3D HOT AIR BALLOON

Materials Needed:

- Printable template
- Scissors
- Glue

Instructions:

1. Print & Cut

- Print out the hot air balloon template.
- Carefully cut out all the pieces.

2. Fold & Assemble the Balloon

- Fold each balloon shape in half along the dotted center line.
- Glue one folded balloon to another, stacking until all are attached to form a 3D shape.

3. Add the Basket Strings

- Cut out the basket strings and glue them to the backside of the balloon on the outer edges.

4. Attach to the Background

- Apply glue to one outer half of the 3D balloon to the printed background.
- Add glue to the opposite half and press it down to fully secure the balloon.

5. Assemble & Attach the Basket

- Fold and assemble the basket.
- Apply glue to the back flaps of the basket then glue it to the background and place the strings into the basket.

6. Final Step

- Allow the craft to fully dry before handling.
