

# MEMORIAL DAY LANTERN CRAFT

## Materials Needed:

- Printable Templates
- Scissors
- Glue

## Instructions:

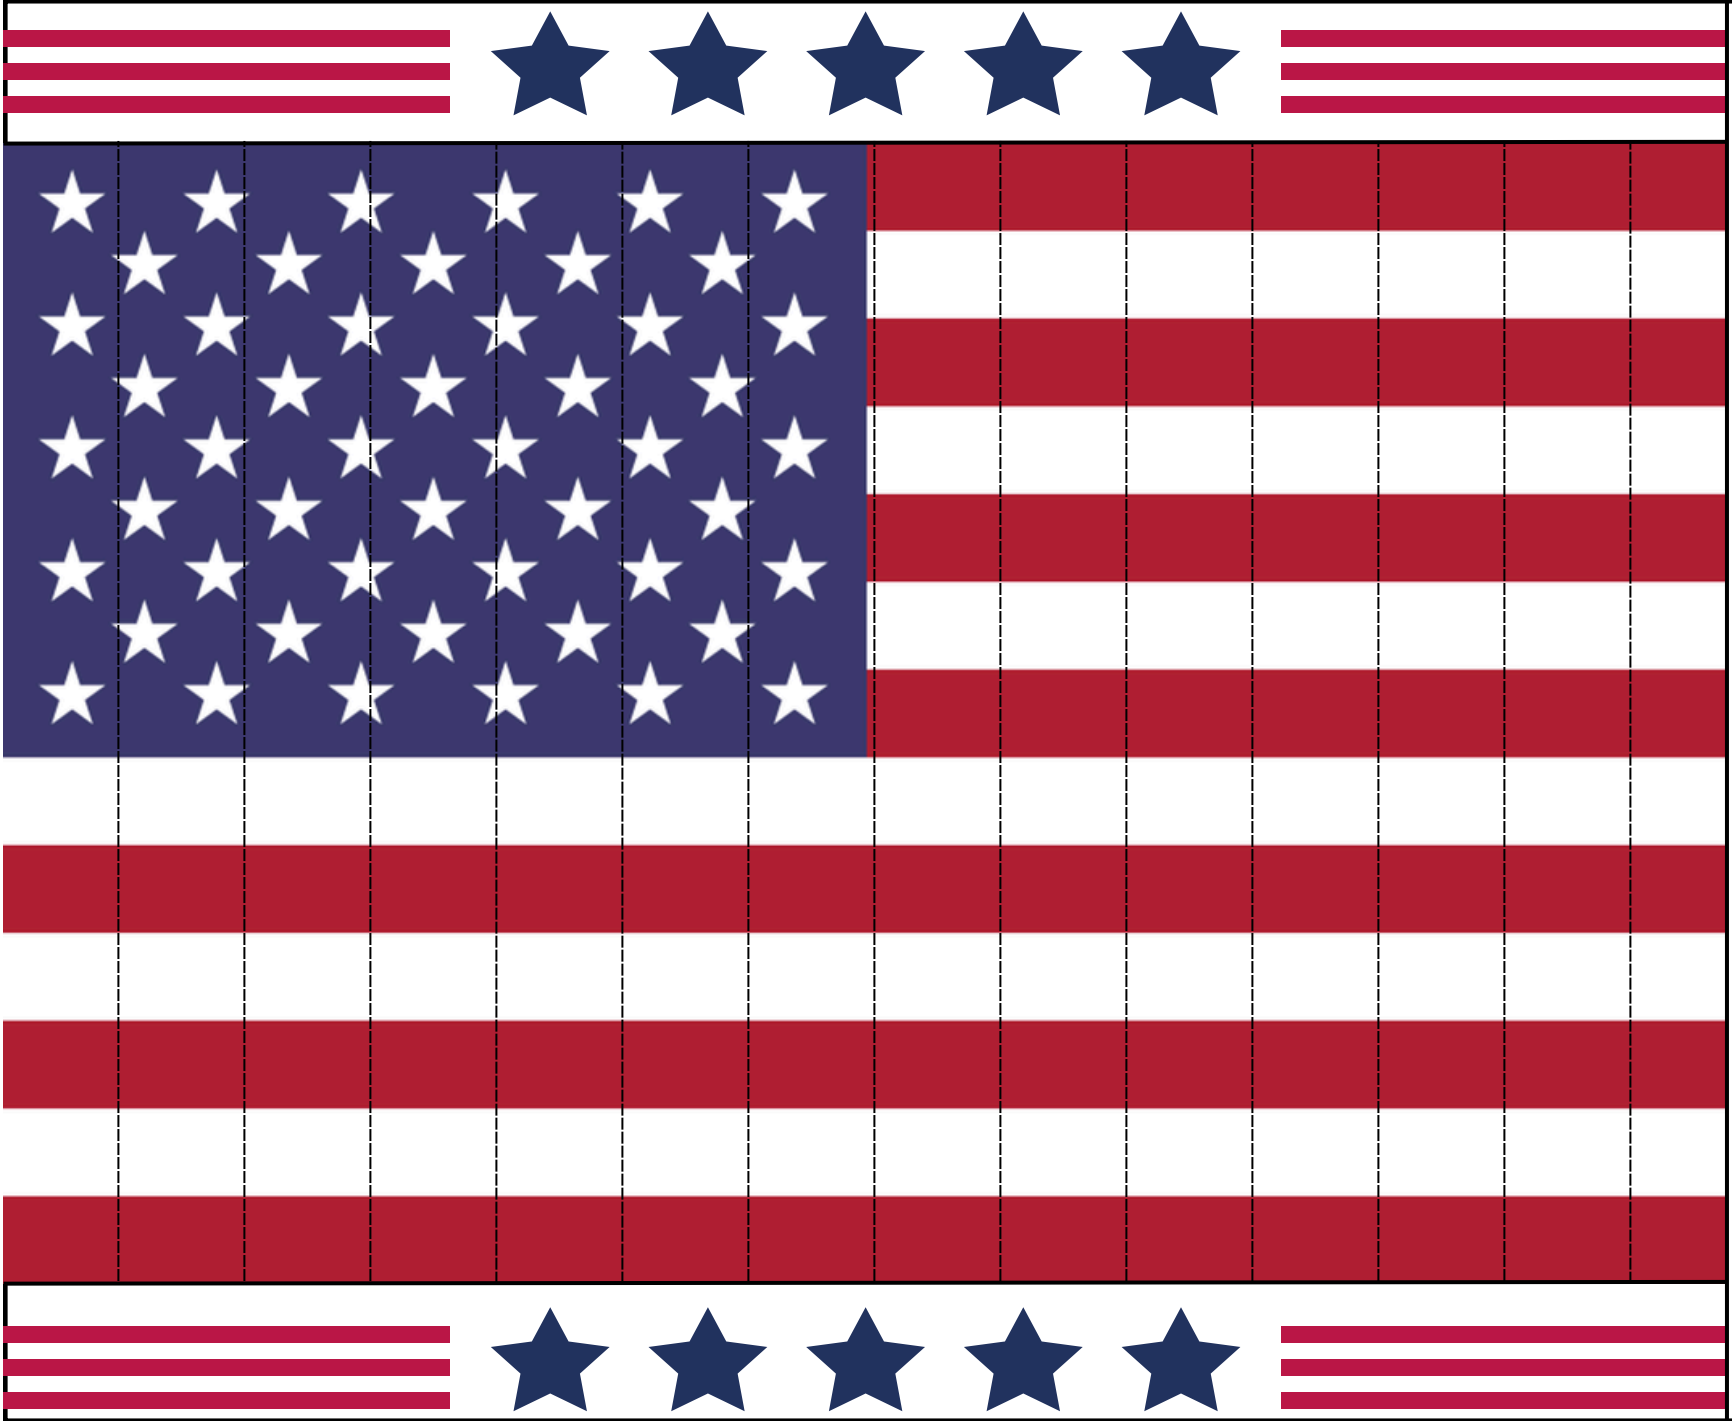

- Print out the templates.
- Carefully cut around the outer edges of each piece. Set aside the long strap for later.
- Fold along the glue line to create a crease, then unfold.
- Fold the main lantern piece in half horizontally.
- Cut along the dotted lines, be sure not to cut all the way through. These cuts will create the “teeth” or slits in your lantern.
- Unfold the lantern, apply glue along the glue line, and roll the ends toward each other with the patterned side facing out to create a cylinder shape.
- Overlap the edges along the glue line and press to secure.
- Apply glue to the ends of the long strap and attach it to the top of the lantern as a handle.
- There is an additional page with strips of paper that are meant to be an additional decoration that you can glue to the bottom of your lantern for extra decoration.
